

Bryterdays

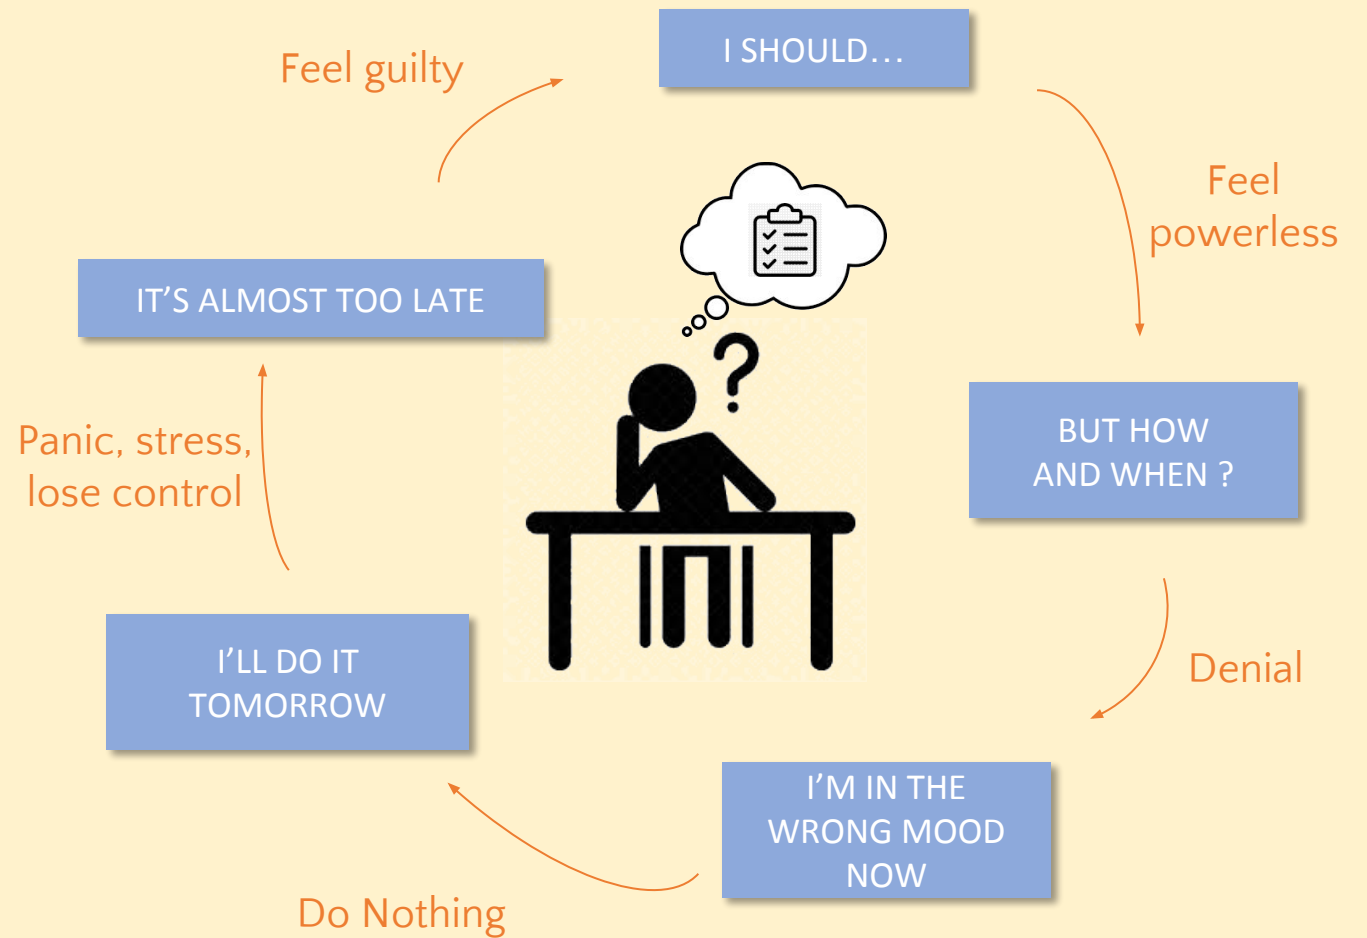

Don't plan, pre-plan

The Problem

The brain has a primitive tendency to see **discomfort** as something to be protected from and to **keep away**.

Daily-basis **tasks and activities** being time and effort **consuming** result in a frustrating **procrastination**.

People see themselves as **lazy and powerless** while it's normal and legitimate.

Value Proposition

What if the community could help me out
to build and pre-plan through...

Collective intelligence, from which
experience and knowledge are
shared on planning events

**Time
Management**

A single **platform** containing
plannings on **any subject**

**Feel
Powerful**

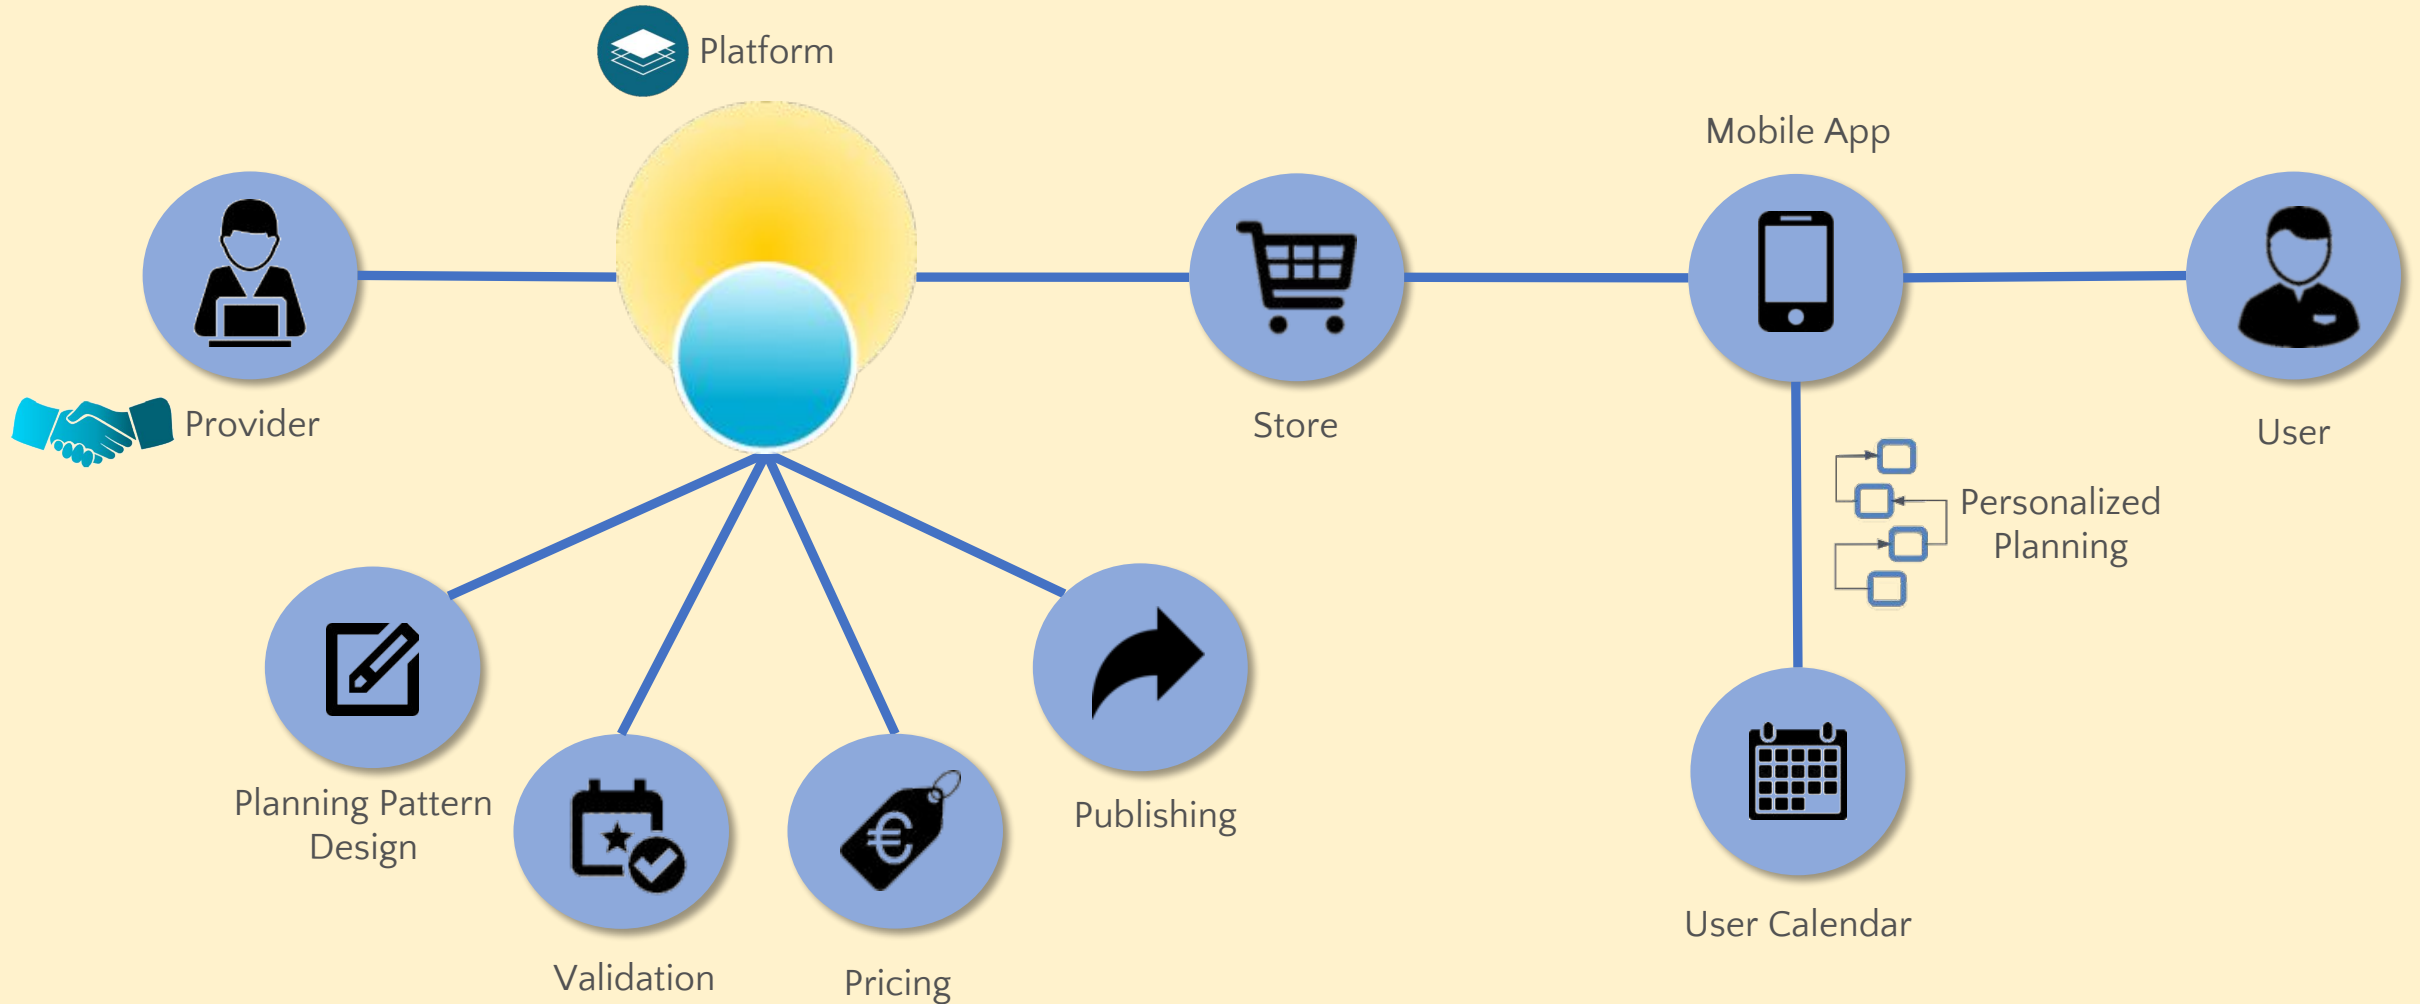

A **personalized** planning
for my own need

**Sense of
control**
